Discover the WPS Edge, where experience, commitment, and innovation converge

With over three decades of industry immersion, our unmatched expertise adds perspective and value to every interaction.

Solid financial backing empowers us to stand firm, even in challenging times.

Our operations are supported by a dedicated logistics team, ensuring seamless transactions.

Certified for excellence. Products supplied by WPS are sourced from facilities with various quality certifications, including OHSAS, ISO, BRC, etc., ensuring the highest standards in every delivery.

Innovation fuels our journey – expect cutting-edge tech support and pioneering product development.

Cost-efficiency isn't just a phrase – it's a commitment. Our competitive rates underline this credo.

North America is our prime geography, with multiple warehousing locations for enhanced accessibility.

At WPS, packaging isn't just a product; it's a solution. Our R&D teams craft tailored packaging innovations to your pressing packaging problems.

Web Value Added (VA) Film

Unlock Performance

WPS has advanced VA film manufacturing facilities strategically located across different continents, including Asia and Africa, capable of producing films with thicknesses ranging from 13 – 20 microns. These facilities have a capacity of 17,000 MT. We have a highly skilled manufacturing team and follow continuous improvement techniques to make world-class VA film products.

Our team consists of skilled professionals dedicated to continuous improvement techniques, ensuring the creation of world-class VA film products that meet the highest industry standards.

Process Quality & Excellence

All our production units hold various certifications and accreditations, including ISO 9001:2008, TS 16949:2009, OHSAS 18001:2007, FDA 21 CFR 177.150, EC 207/19/EC, ISO 14000 (Environmental Protection System), ISO 9000 (Quality Assurance System), ISO 22000, and QS Certification (Food Safety Quality Certification).

Win on Quality & Cost

Our facilities have the latest 8.7 meter 5-layer and 3-layer coextrusion technology from Bruckner Group GmbH (Germany). Our cutting-edge R&D equipment and production lines are imported from Germany, Japan, and Austria.

The manufacturing facilities are based in the most cost competitive regions/locations with easier access to major ports for easier logistics of both raw material and finished goods.
